SUBJECT INDEX TO VOLUME 104

Thermal and fluid design

Axial static pressure vari tions in inner and side subchannels of a 61-tube wire-wrap bundle, H. Fenech and F.O. Bennett 104 (1987) 83
Distributed resistance modeling of wire-wrapped rod bundles, H. Ninokata, A. Efthimiadis and N.E. Todreas 104 (1987) 93
Natural circulation in parallel vertical channels with different heat inputs, T. Takeda, H. Kawamura and M. Seki 104 (1987) 133
On the thermal analysis of pressure tube /calandria tube contact in CANDU reactors, M. Shoukri and A.M.C. Chan 104 (1987) 197

Heat conduction and transfer

Air–hydrogen deflagration tests at the University of Pisa, M. Carcassi, F. Fineschi and G. Lombardi 104 (1987) 241
Integrated analysis of core debris interactions and their effects on containment integrity using the CONTAIN computer code, D.E. Carroll, J.L. Tills, G.D. Valdez, K.D. Bergeron and D.C. Williams 104 (1987) 277

Fluid dynamics

Scaling of two-phase flow transients using reduced pressure system and simulant fluid, G. Kocamustafaogullari and M. Ishii 104 (1987) 121
An improved numerical scheme with the fully-implicit two-fluid model for a fast-running system code, J.J. Jeong and H.C. No 104 (1987) 145

Engineering mechanics

The dynamic response of multi-layers AGR core brick arrays, K.M. Ahmed 104 (1987) 1
Nonlinear seismic response analysis of embedded reactor building based on the substructure approach, M. Hasegawa, T. Ichikawa, S. Nakai and T. Watanabe 104 (1987) 175
Response of a NPP reactor building under seismic action with regard to different soil properties, E. Wagenknecht 104 (1987) 187
Plastic analysis of concrete containment structure, A. Hindy and A. Danay 104 (1987) 305

Materials properties

Radiation-induced embrittlement in light water reactor pressure vessels, R. Gold and W.N. McElroy 104 (1987) 155
A simplified model for concrete at low confining pressures, H.D. Hibbitt 104 (1987) 313

Mechanical design, component fabrication and testing

Positive use of damping devices for piping systems – Some experiences and new proposals, M. Kunieda, T. Chiba and H. Kobayashi 104 (1987) 107
Preservice and inservice requirements for containment structures in the United States – A status report, R.F. Sammataro 104 (1987) 267
The influence of non-linearity and foundation behaviour on containment integrity, J.J.B. Evans and P.M. Keogh 104 (1987) 357
Failure pressure and failure mode of the latest type of German PWR containments, R. Krieg, B. Göller, G. Messemer and E. Wolf 104 (1987) 381

Reactor concepts and systems analysis

Application of Goal Tree–Success Tree model as the knowledge-base of Operator Advisory Systems, I.S. Kim and M. Modarres 104 (1987) 67
Risk analyses of the Ringhals plants: Containment behaviour and filtered vent, R. Espefält, L. Gunsell, G. Löwenhielm, G. Kaiser and P.J. Fulford 104 (1987) 217
Containment integrity is a major part of KKL-safety systems PRA, Th. Schaub and H.P. Hänni 104 (1987) 225
Analysis of strategies for containment venting in case of severe accidents, K. Bracht and M. Tiltmann 104 (1987) 235
Preservice and inservice requirements for containment structures in the United States – A status report, R.F. Sammataro 104 (1987) 267

Safeguard engineering

Application of Goal Tree–Success Tree model as the knowledge-base of Operator Advisory Systems, I.S. Kim and M. Modarres 104 (1987) 67

Layout of nuclear facilities

Analysis of strategies for containment venting in case of severe accidents, K. Bracht and M. Tiltmann 104 (1987) 235

Structural design, construction methods and testing

Nonlinear seismic response analysis of embedded reactor building based on the substructure approach, M. Hasegawa, T. Ichikawa, S. Nakai and T. Watanabe 104 (1987) 175

Plastic analysis of concrete containment structure, A. Hindy and A. Danay 104 (1987) 305

Results of large-scale test of discontinuity region in a prestressed concrete containment, N.W. Hanson, D.M. Schultz, J.J. Roller and H.T. Tang 104 (1987) 321

Analytical correlation and interpretation of full scale containment specimen tests, R.A. Dameron, R.S. Dunham, Y.R. Rashid and H.T. Tang 104 (1987) 329

Construction of a 1/6-scale concrete containment model, D.S. Horschel 104 (1987) 341

An evaluation of structural failure modes for prestressed concrete containments, P. Shunmugavel and O. Gurbuz 104 (1987) 349

The influence of non-linearity and foundation behaviour on containment integrity, J.J.B. Evans and P.M. Keogh 104 (1987) 357

Structural analysis of a Japanese BWR MARK-I containment under internal pressure loading, T. Isozaki, K. Soda and S. Miyazono 104 (1987) 365

Failure mechanisms of LWR steel containment buildings subject to severe accident loadings, D.B. Clauss 104 (1987) 371

Radiation shielding

Containment response and radiological release for a TMLB' accident sequence in a large dry containment, R.D. Gasser, P.P. Bieniarz and J.L. Tills 104 (1987) 295

Isotope engineering

Containment response and radiological release for a TMLB' accident sequence in a large dry containment, R.D. Gasser, P.P. Bieniarz and J.L. Tills 104 (1987) 295

Information

Preface to the Topical Issue on the Third Workshop on Containment Integrity, H. Karwat and W.A. von Riesemann 104 (1987) 215

Book reviews

Book review: 'Probabilistic Fracture Mechanics and Reliability' by J.W. Provan, K. Kussmaul 104 (1987) 211

Nuclear safety

On the thermal analysis of pressure tube/calandria tube contact in CANDU reactors, M. Shoukri and A.M.C. Chan 104 (1987) 197

Risk analyses of the Ringhals plants: Containment behaviour and filtered vent, R. Espefält, L. Gunsell, G. Löwenhielm, G. Kaiser and P.J. Fulford 104 (1987) 217

Containment integrity is a major part of KKL-safety systems PRA, Th. Schaub and H.P. Hänni 104 (1987) 225

Analysis of strategies for containment venting in case of severe accidents, K. Bracht and M. Tiltmann 104 (1987) 235

Evaluation of uncertainties in risk emanating from a number of severe accident issues, A.S. Benjamin, G.R. Boyd, W.B. Murfin and D.M. Kunsman 104 (1987) 249

Integrated analysis of core debris interactions and their effects on containment integrity using the CONTAIN computer code, D.E. Carroll, J.L. Tills, G.D. Valdez, K.D. Bergeron and D.C. Williams 104 (1987) 277

Scaling and extrapolation of hydrogen distribution experiments, H. Karwat 104 (1987) 285

Containment response and radiological release for a TMLB' accident sequence in a large dry containment, R.D. Gasser, P.P. Bieniarz and J.L. Tills 104 (1987) 295

Construction of a 1/6-scale concrete containment model, D.S. Horschel 104 (1987) 341

An evaluation of structural failure modes for prestressed concrete containments, P. Shunmugavel and O. Gurbuz 104 (1987) 349

Failure pressure and failure mode of the latest type of German PWR containments, R. Krieg, B. Göller, G. Messemer and E. Wolf 104 (1987) 381
